James Cunningham

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in frontend development. Motivated in creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs | Remote

January 2022 — Present

- Fortified techniques in web development skills to create applications.
- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured and well designed front end applications.
- Upskilling program to level up coding skills.
- Uses GitHub to track coding challenges for Codewars in the upskill program.

Recent Projects/Activities:

SunnySide Agency (Landing page):

Given a design, the landing page incorporates front end development that enhances the user experience using striking design that captures visitors attention. The landing page uses HTML CSS and JavaScript

CrazyTicTacToePrototypeGame:

The game features a tic-tac-toe game that uses React components. Uses HTML, CSS, JavaScript and React framework.

Codewars:

Confirming fundamental skills by completing daily Codewars challenges. The challenges are completed in Java and JavaScript then committed to GitHub.

VOLUNTEERING/ORGANIZATIONS

IEEE | Los Angeles, CA

March 2020 — Present

Member that contributed to tech discussions.

ACM | Los Angeles, CA

March 2016 — March 2019

Discussed topics about tech/coding. Studied efficient proven algorithms and completed coding challenges.
